Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lasure et al. '910 in view of Blumenthal '321.

Lasure discloses all of the claim limitations in a similar device comprising a turning apparatus (10) that turns workpieces about an axis perpendicular to a plane of the workpiece.

Lasure does not disclose a spacing apparatus that spaces said workpiece.

Blumenthal teaches the use of a spacing apparatus (fig. 4, 9a) that spaces workpieces from a first pitch to a second pitch (pitch change is shown in fig. 4) for the purpose of providing for a means to receive discrete parts traveling at a first pitch and apply the parts to a carrier/drum with an appropriate second pitch in order to facilitate transfer (C2/L62-63; C1/L22-27; C1-C3).

It would have been obvious to one having ordinary skill in the art at the time of the invention to have employed the use of a spacing apparatus, as taught by Blumenthal, that spaces workpieces from a first pitch to a second pitch for the purpose of providing for a means to receive discrete parts traveling at a first pitch and apply the parts to the turning apparatus with an ensured appropriate second pitch in order to facilitate transfer.

Regarding claim 11, In Lasure the workpieces are turned one of clockwise or counter-clockwise.
